STATEMENT ABOUT CALSSIC ROLLERSKI PROTOTYPE BY MR.
DRAGAN MILOJEVIC.

We have tested this classic prototype now in several conditions,
dry tarmac, worn tarmac, wet tarmac and in different temperatures.
Result is that it is very good to ski imitating the classic skiing on snow conditions,
where the kick is not 100% from kick beginning on. After giving back sortly you get the
grip like in winter conditions with kick wax.
The ski is absolutely interessant and should be considered as one of the best feeling classic
ski for training and competition in summer skiing.
